ABOUT

Results-driven Software Engineer with nearly 4 years of experience specializing in designing, developing, and scaling distributed backend systems and microservices using Go (Golang) and Java. Demonstrated history of optimizing system performance, delivering features for Microservices, and resolving critical production issues. Strong analytical foundation with expertise in Data Structures and Algorithms (600+ problems solved) and comprehensive System Design (HLD & LLD). Adept at thriving in Agile environments and leveraging cloud-native technologies to build resilient, high-availability architecture for large-scale enterprise platforms.

CORE COMPETENCIES

Go (Golang) | Java | C++ | SQL | RESTful APIs | gRPC | Microservices | Distributed Systems | System Design (HLD & LLD) | Data Structures & Algorithms | Docker | Kubernetes | AWS | GCP | Apache Kafka | PostgreSQL | MongoDB | Redis | GitLab | Bitbucket | Jenkins | CI/CD | GitHub Copilot | Claude | ChatGPT

PROFESSIONAL EXPERIENCE

Software Engineer

Dec 2024 – Present

OpenText | Bengaluru, India | Project: AIOps

- **Feature Delivery & Resiliency:** Led the end-to-end design and delivery of critical resiliency features for the AIOps platform, effectively resolving 25+ production issues and significantly enhancing overall system stability.
- **Observability & Health Tracking:** Architected and delivered the end-to-end GCP Collector self-health status monitoring feature, providing real-time observability to track and validate metric collections.
- **Anomaly Detection:** Engineered and integrated out-of-threshold anomaly support, improving system predictability, automated alert mechanisms, and proactive issue resolution.
- **Quality Assurance:** Bolstered unit test coverage across mission-critical microservices, drastically mitigating regression risks and strengthening code reliability prior to deployment.
- **System Architecture:** Actively contributed to comprehensive system design discussions, championing fault tolerance, distributed processing, and horizontal service scalability.
- **Production Support:** Facilitated seamless production releases through rigorous integration testing and deep-dive debugging of complex distributed components.
- **Mentorship:** Mentored junior engineers, fostering a culture of technical excellence by enforcing strict adherence to code quality and system design best practices.

Software Engineer

July 2022 – Dec 2024

Radisys India Pvt. Ltd. | Bengaluru, India | Project: CBAC

- **Real-Time Telemetry:** Architected, designed, and deployed a real-time telemetry microservice leveraging Go and Apache Kafka, elevating system observability and slashing response times by 30%.

- **System Migration:** Orchestrated a seamless migration of core services from Go 1.13 to 1.21, ensuring strict backward compatibility and zero downtime in live production environments.
- **Process Optimization:** Revamped debugging workflows and introduced structured engineering protocols, successfully reducing open defect backlogs by an impressive 80%.
- **Test Automation:** Elevated automated testing success rates to 98% and boosted overall code coverage to 78%, fortifying release reliability and CI/CD pipeline stability.
- **Corporate Innovation:** Demonstrated strong engagement in corporate innovation, actively participating in the Radisys Codeathon (2022, 2023), Radisys Innovation Event (2023), and Radisys Run Event (2023).

Software Engineer Intern

Jan 2022 – June 2022

Radisys India Pvt. Ltd. | *Bengaluru, India*

- **Workflow Automation:** Spearheaded the automation of testing workflows utilizing the Robot Framework, drastically improving validation efficiency within continuous integration pipelines.
- **Cloud-Native Development:** Gained foundational, hands-on expertise in building and deploying cloud-native enterprise microservices utilizing Go, Kafka, Docker, and Kubernetes.

EDUCATION

Master of Computer Applications (MCA)

2022

National Institute of Technology (NIT), Trichy — CGPA: 7.7/10.0

Bachelor of Science (Hons.) in Computer Science

2017

Ranchi University, Ranchi — CGPA: 7.8/10.0

CODING PROFILES, CERTIFICATIONS & ACCOMPLISHMENTS

- **Algorithmic Excellence:** Successfully solved 600+ Data Structures and Algorithm problems across LeetCode, GeeksForGeeks, and HackerRank.
- **Competitive Programming:** Finalist at Radisys Codeathon 2023, competing against top engineering talent in algorithmic and system development challenges.
- **Extracurricular Leadership:** Winner of the Inter-NIT Cricket Tournament (2021), showcasing excellent teamwork and competitive spirit.
- **Coding Profiles:** LeetCode | GeeksforGeeks | HackerRank
- **Certifications:** DSA (GeeksforGeeks) | GoLang (KodeKloud) | C++ & STL (GeeksforGeeks)
